# THE MEDIC

---

**hahnemann  
medical  
college  
philadelphia  
pennsylvania**

A great part of the instruction in Medicine that forms the transition from classroom to clinic, the translation of thought into action, occurs at the bedside and in the informal conference. It takes a unique individual with a special dedication to be able to convey knowledge in these often adverse situations. Such an individual is Newlin F. Paxson.

A true gentleman, he has shown us the value of tact, graciousness and dignity. As an administrator he has demonstrated interest in following the advances of Medicine. As a teacher and clinician, Dr. Paxson has revealed a thorough grasp of his field, a ready wit, and open mind, and an understanding heart.

Because of his vital position in our education, we, the Class of 1962, dedicate our MEDIC to Dr. Newlin F. Paxson.

---

## dedication

NEWLIN F. PAXSON, M.D.  
*Professor and Chairman,  
Department of Obstetrics  
and Gynecology*

to

# the class of 1962

The class of 1962 is the first graduating class since I have been privileged to be Dean of this school. As you prepare to take your leave I hope you will reflect on the many things we are trying to accomplish here. The goals of medical education are far more vast in 1962 than they were in 1942, and the responsibilities of every institution for higher learning have stretched from those of service to its own community to encompass obligations to our country and, indeed, to the entire world.

By virtue of your parchment it is your right to insist that your school meet its obligations to this nation and the world by providing progressive educational programs in medicine, in the graduate sciences and the para-medical fields, and also by promoting the profession of medicine through scientific research. By virtue of their appointment the faculty can expect your support and encouragement. This can be given best by maintaining an awareness and interest in our endeavors and by interpreting our purposes for the understanding of others. More than anything else you can serve our cause by setting excellence as your own goal.

With these responsibilities clear in mind, with recognition that you will soon be alumni of a school with an excellent faculty, a curriculum which is being constantly revised to meet the demands of our modern society, a program in scholarly research which is envied by many and an ever developing sense to serve our nation and the world, I urge you to take up the duties of a physician. Apply the techniques you have been given. Enrich them by remaining a perpetual student. And always remember you are the product of this school. In your accomplishments will rest the final judgment of the greatness of this College. You have our best wishes for your success. God bless you!

WILLIAM F. KELLOW, M.D.  
Dean

# THE OATH

**I** SWEAR by Apollo the physician and  
Asclepius & Health & All heal & all the gods & goddesses  
that according to my ability & judgement

**I WILL KEEP THIS OATH**  
to this stipulation - to reckon him who taught me this, not  
equally dear to me as my parents, to share my substance  
with him & relieve his necessities if required, to look upon  
his offspring in the same footing as my own Brothers, & to teach them this Art  
if they shall wish to learn it.

**WITHOUT FEE OR STIPULATION**

to teach by precept, lecture, & every other manner of instruction, I  
will impart a knowledge of the Art to my own sons, & those of my  
teachers, & the disciples bound by a stipulation & sworn

**ACCORDING TO THE LAW OF MEDICINE**

but to none others, I will follow the system of regimen which  
according to my ability & judgement I consider

**FOR THE BENEFIT OF MY PATIENTS**

I abstain from whatever is deleterious & mischievous, I will give  
no deadly medicine to any one if asked, nor suggest any such  
counsel. In like manner I will not give to a woman a pessary to produce  
abortion.

**WITH PURITY & WITH HOLINESS I WILL  
PASS MY LIFE, & PRACTICE MY ART**

I will not cut persons laboring under the stone, but will leave this to be  
done by men who are practitioners of this work. Into whatever houses  
I enter, I will go into them for the benefit of the sick, & will abstain from  
every voluntary act of mischief & corruption. **AND FURTHER**  
from the seduction of females or males, of freemen & slaves.

Whatever in connection with my professional  
practice or not in connection with it I see or hear  
in the life of men which ought not to be spoken  
of abroad, **I WILL NOT DIVULGE**

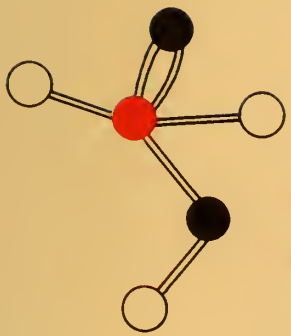

as reckoning that all such should be kept secret.  
While I continue to keep this Oath unviolated,  
may it be granted to me to enjoy life & the practice  
of the Art respected by all men in all times!

But should I trespass & violate this Oath,  
may the reverse be my lot!

1770

# ADMINISTRATION

HAROLD A. TAGGART, M.D.  
*Associate Dean*

Dr. Taggart has contributed invaluable to the growth of Hahnemann by providing strong leadership and giving unselfishly of himself. By his trust and friendship he has placed us forever in his debt. As Dr. Taggart prepares to leave his present position for that of full-time Medical Director of the Hospital he carries with him our sincere good wishes.

ALICE C. BRITT, B.S. in Ed.  
*Registrar*

With a warm smile and a friendly greeting, Miss Britt almost singlehandedly calmed our fears and attempted to lighten our burdens, both scholastic and financial. Few people enjoy her place in our hearts. When times seemed darkest, Miss Britt always found a way.

MARCELLA BALUK  
*Secretary to the Dean*

JANET TOOHEY  
*Secretary to the Registrar*

ERNEST LEISS  
*Alumni Secretary*

JEAN MacARTHUR  
*Front Office Secretary*

LUCY COOKE  
*Librarian*

SHIRLEY MOHN  
*Bookstore*

# PRE-CLINICAL YEARS

On September 8, 1958, 108 little rascals with sweaty palms and spastic colons eagerly entered Lecture Room A for the first time, fully anticipating complete exposure to the gems of medical knowledge which, we were sure, would emanate from that great shining dome in the front of the Hall. Such was our introduction to the course in Anatomy—an ordeal that was destined to make a lasting impression not only upon our minds, but also upon our clothing, which would forever carry the familiar odor of formaldehyde.

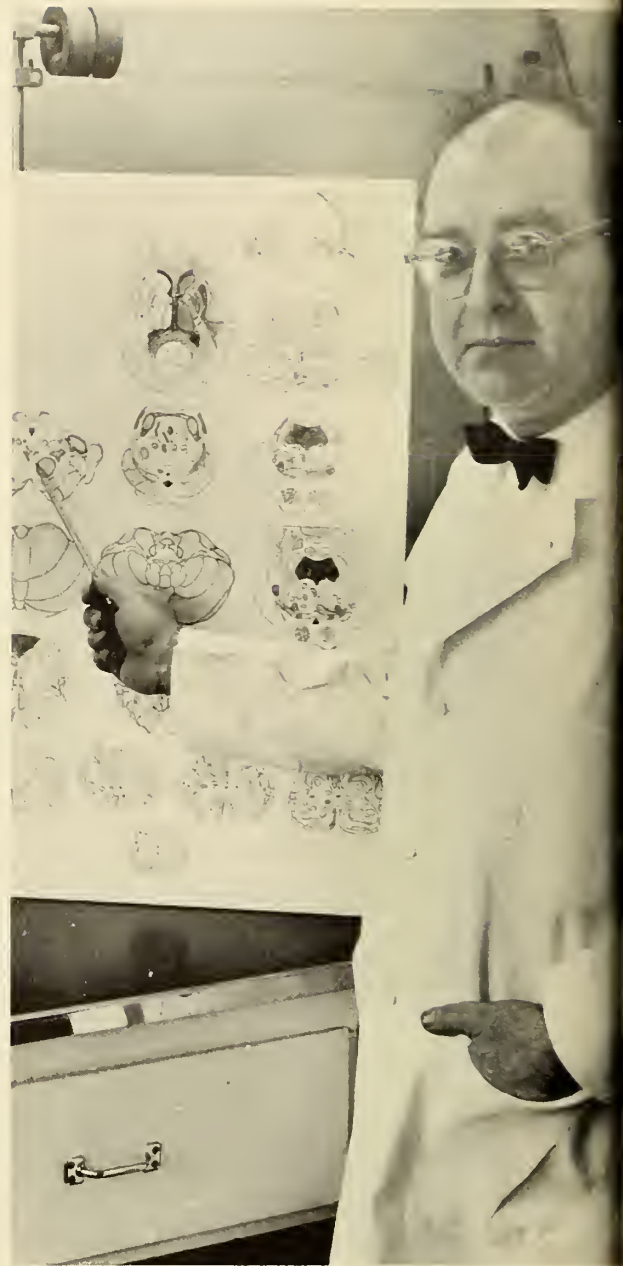

The dissecting table became our "open sesame" to the structures of the human body. Lectures were given by all the members of the department. Dr. Callahan taught us how to recite mnemonics with a Texas accent and Dr. Perlmutter gently led us through the never-ending world of intricate "basic concepts". Daily readings from Woodburne were offered by Dr. Crouse and, when all seemed lost and the world appeared a dank and desolate mess, Uncle Ray was only too happy to show us how to study for two hours a night, watch T.V., get 8 hours of sleep and still pass the exams.

Thus, amidst the rattle of bone boxes and nerve shaking exam buzzers, was laid the basic foundations upon which we would continue to build for the remainder of our professional careers.

# anatomy

J. H. VAN DYKE, Ph.D.

*Professor and Acting Chairman, Department of Anatomy*

H. I. PERLMUTTER, Ph.D.

*To us . . . teacher, confidant, enduring friend . . .*

"I thought you said he had testicular atrophy."

"You will live many years and beget many children."

WILLIAM CALLAHAN, Ph.D.  
"What do you mean you never wear a bow tie with a button-down?"

GAIL S. CROUSE, Ph.D.  
"But Ray, you said I could have the department when you leave."

# histology

Histology was something of a slow starter, commencing for some of us, to the musical tinkle of "B" boxes being opened upside down and oil lenses gleefully crushing cover slips. When we were told, in no uncertain terms, that we had to "know the normal before knowing the abnormal" we bore down in earnest. The majority came away with at least an appreciation for Histology if not a thorough understanding thanks to the patience of Dr. Van Dyke, the cajoling of Dr. MacCreight and the browbeating of Dr. Amenta (the lesser). Just one question: What exactly is Hilton's Line?

PETER S. AMENTA, Ph.D.

"Now back in Chicago we used to do it this way . . ."

"If we shorten the sleeves two inches . . ."

"You might say it resembles thousands of tiny little fingers rolling toasted marshmallows through a cyclone fence into a gigantic vat of chicken fat."

# neuroanatomy

We will no doubt carry the memory (and the scars) of Neuroanatomy forever with us. From the first spastic day when Dr. Truex began to lecture faster than anyone could draw even with four colored pencils, we knew deep down inside that we had had it. This impression was strengthened by the time we were introduced to the machine that whisked the Professor's sketches out of sight as fast as he could draw, and confirmed the day that *all* of the blackboard was used to describe the cerebellum. Quizzes were unbelievable match-your-wits contests with the department trying to out-guess the guess of the student. The brief rays of sunshine provided by Dr. Polley were all too few. It was even rumored that eventually there would be comprehension but somehow none of the staff showed up that day . . .

EDWARD H. POLLEY, Ph.D.

"Has anyone got the correct time?"

"I think it belched!"

So what happened after you showed her the distribution of T<sub>4</sub>."

RAYMOND C. TRUEX, Ph.D.

"In the 15 remaining minutes we will discuss the cerebrum . . ."

BEN CASEY, M.D.

M. JOHN BOYD, Ph.D.  
*Professor and Chairman, Department of Biochemistry*

Upon entering Biochemistry identity was completely lost, and so were most of us. We did get to meet the rest of the class, however, since seating was at random most of the time. Once things settled down we all started to pull together to get experiments finished by 3:30 P.M. This was accomplished by means of hard work, cooperation, and rotating Coke time. The day of reckoning finally came with a practical using No-Cal as the unknown.

The experience proved enlightening and educational despite these occasional setbacks. Due to the efforts of a dedicated and interested group of professors we were exposed to the most recent advances in a constantly advancing field.

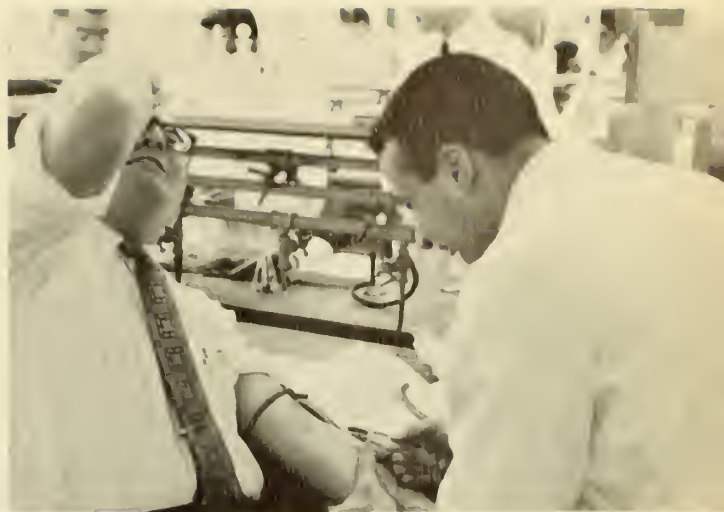

# biochemistry

JOSEPH S. DeFRATES, Ph.D.

"What are you, some new kind of nut?"

"My hand's caught in the drawer!!"

PETER OESPER, Ph.D. — CARL ALPER, Ph.D.

"Maybe we should have let it ferment for another day, Carl."

JAY S. ROTH, Ph.D.

"According to yesterday's laboratory results the entire class is in diabetic coma."

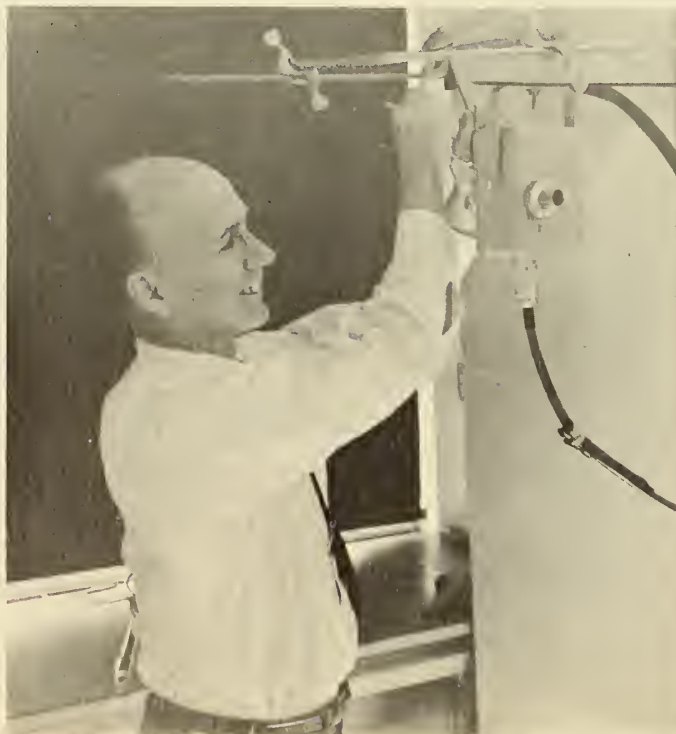

# physiology

During our course in physiology we became uneasily aware that beneath the placid exterior sported by each of the department members, lay some fantastic, concept-shattering knowledge which in time would erupt on mankind's complacency. It was with almost diabolical cunning and patience that they were able to wend their way through miles of kymograph records without even a suggestion of the research which will even now carry these men to the gates of Stockholm.

We have now verified the fact that ten years ago a prominent member of the department suddenly expired while delivering a masterful lecture on "The Significance of the Decorticate Preparation in Medical School". Dr. Scott and his colleagues were undismayed by the sudden change in the physical appearance of their co-worker (his personality was fortunately undisturbed) and were subsequently capable, by inconceivably agile maneuvers, to restore the professor to viability, by complex manipulations on the Tilt Board. A full report of this feat will be published shortly in the "Thermometer". Until then, "We can continue to look forward to his active participation in the department's research and teaching program", Ida said.

JOHN C. SCOTT, Ph.D.  
*Professor and Chairman, Department of Physiology*

EMERSON A. REED, Ph.D.  
"Just a few minutes on the tilt board and you'll feel like a new man."

"A joke's a joke fellas, but what did you do with Dr. Reed?"

"Rhythm system, big deal."

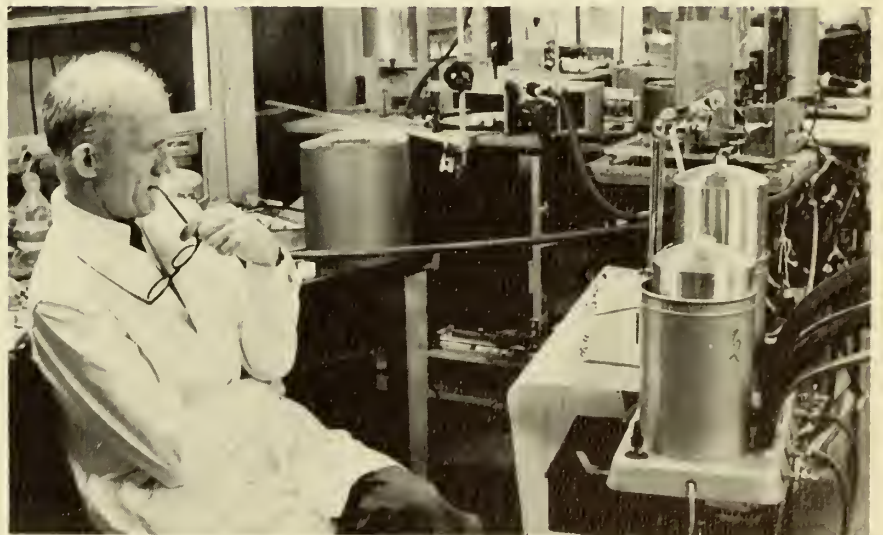

ANDRE VIALLET, M.D.

"The next time you leave me with the bill at Brown's . . ."

"Okay Schatz, cough up that old exam."

AARON A. BECHTEL, A.B.

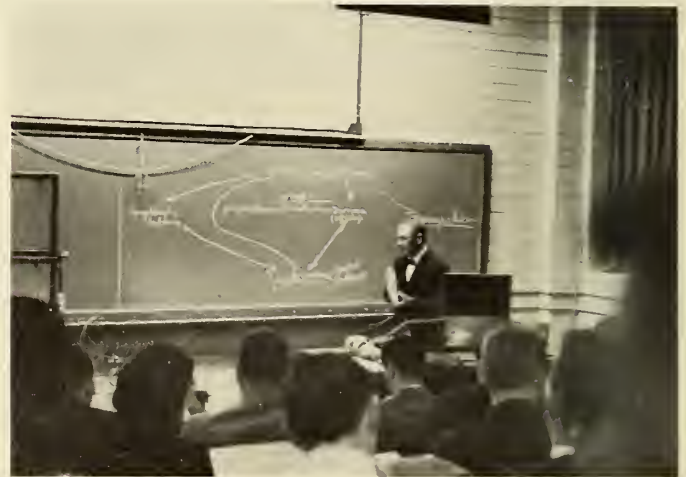

"I'll bet they don't find the answer to this in Dr. Scott's notebook."

# pathology

The study of pathology finally removed the partitions separating the Freshman subjects and became the common meeting ground for anatomy, histology, physiology and biochemistry, and the area of maturation of the class.

One hundred and thirty years ago Marie Francois Xavier Bichot, an eminent French anatomist and physiologist (1771-1802) and founder of scientific histology and pathologic anatomy, said: "You may take notes for twenty years from morning to night at the bedside of the sick, upon the diseases of the heart, lungs, gastric viscera, etc. and it will be to you only a confusion of symptoms, which not being limited in one point will necessarily present only a train of incoherent phenomena. Open a few bodies and the obscurity will soon disappear which observation alone would never have been able to have dissipated. Dissect in anatomy, experiment in physiology, follow the disease and make the autopsy in medicine. This is the threefold path without which there can be no anatomist, no physiologist and no physician."

JOSEPH E. IMBRIGLIA, M.D., D.Sc. (Med.)  
*Professor and Chairman, Department of Pathology*

"And in closing . . . I would like to state . . . that cystosarcoma phyllodes . . . is a rarely seen, pathological entity."

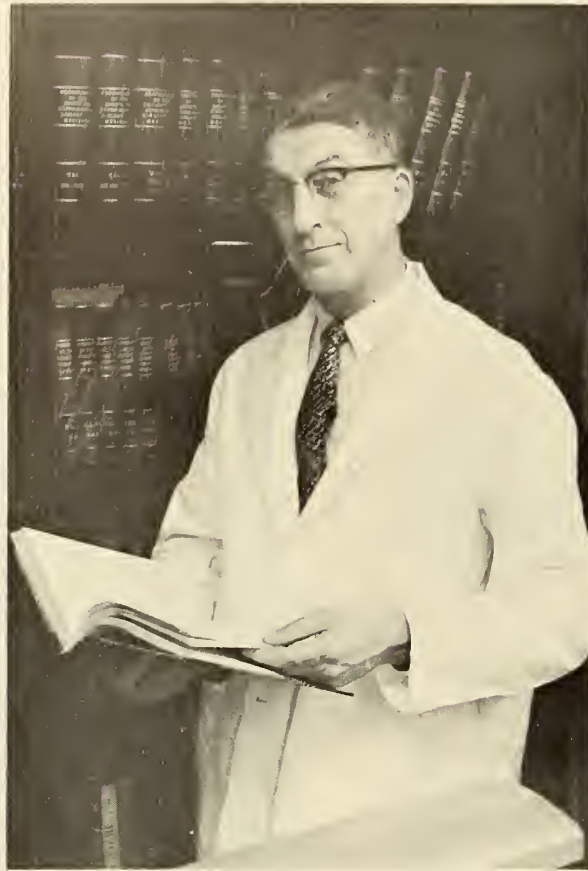

ROSARIO MANIGLIA, M.D., E. CARL KOIWAI, M.D., JOHN M. DOLPHIN, M.D.

"We will spare you the unpleasantness of a trial."

"Ughh."

# microbiology

AMEDEO BONDI JR., PH.D.

*Professor and Chairman,  
Department of Microbiology*

The average student beginning the course never envisaged the effects of the simultaneous uncapping of ninety stool specimens or the sudden aspiration of a mouthful of bacteria through a pipette. These were only temporary setbacks in our advance through the microcosm of bacteria and virus or the macrocosm of arthropod, all of which appeared in confusing array on the final practical. ("Anyone see sperm at #30?")

We are grateful for the warning that only surgeons produce drug-resistant bacteria and note that medicine has been enriched immeasurably by the lantern slides of Dr. Moat produced in his sub-basement salon. We do give thanks for the lovely pleomorphism of the technicians which certainly helped to break the monotony of rods and cocci. For the future, we hope that the unknowns will be coded correctly and that the hills of Eastern Tennessee remain ever beautiful.

WILLIAM L. GABY, PH.D.

"You fellers ever had whacht lightnen'?"

Ed. Note: Second student from left is under the influence of white lightning.

ALBERT G. MOAT, Ph.D.  
"Such is the work of the silkworm."

GEORGE BESKID, Ph.D.  
"Yeah, I've had whaht lightnen'."

"They told me I have amebiasis!"

# pharmacology

JOSEPH R. DiPALMA, M.D.  
*Professor and Chairman, Department of Pharmacology*

## MATCHING

There is only ONE right answer for each letter:

- |                    |                  |
|--------------------|------------------|
| A. Medical student | 1. Dry as a bone |
| B. Instructor      | 2. Red as a beet |
| C. Pharmacology    | 3. Mad as a hen  |

Despite six flights of stairs, most sophomores, at least in January, were able to make the Wednesday lab. scene. Fortunately, the six members of each group were able to work diligently and harmoniously together and, with the help of an able Recorder, turned out reproducible, scientific results. At 5:00 P.M., eighty odd pharmacologists reluctantly left their experiments but anxiously hurried home to correlate lab. with text.

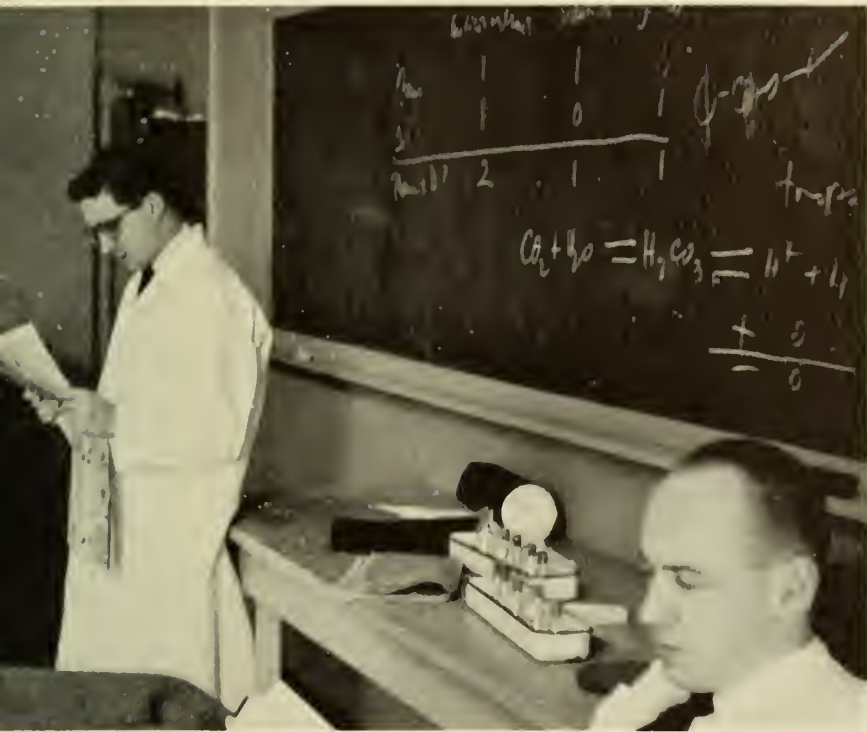

Dr. DiPalma's opening remarks about no early morning lectures surprised and momentarily relieved many nocturnal investigators who continued their research into the effects of ethanol on the CNS. Drill, with its cogent, pithy facts, its lack of ambiguities, its brevity and dynamically illustrated color plates was a welcome replacement to the spoon. Exams showed our educational maturity. We could separate now the wheat from the chaff with only the aid of 30 points.

For some, April was the cruelest month; but most of us happily approached clinical medicine secure in the fact that at least we knew some Pharmacology.

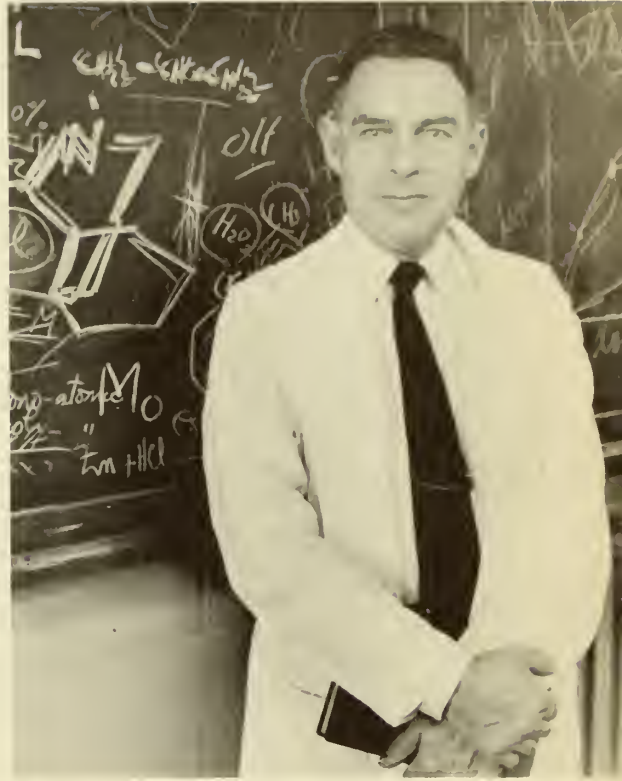

"Loigman, if dis dawg dies . . ."

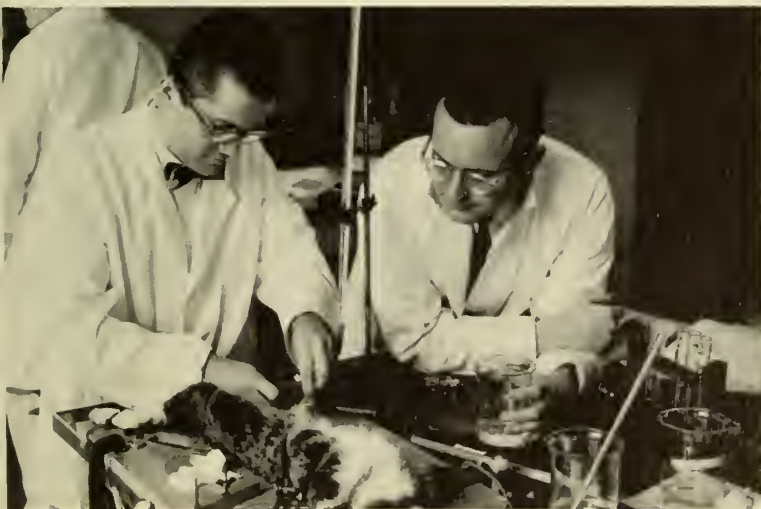

"And in the 6th at Garden State . . ."

ALEXANDER GERO, Ph.D.

"Gentlemen, don't ever use ergot."

"I think we should start the Pit, Jim."

MORRIS A. SPIRTEs, M.D.

"This guarantees a safe suds level, Ma'am."

# clinical pathology

ROSARIO MANIGLIA, M.D.  
*Associate Professor of Pathology*

The "nugget" on Clinical Pathology was that here was the place to pull up those low path grades. Most of the class tried this and, in the bargain acquired hematomas of the antecubital fossa, PSP poisoning, pipette sets, and an everlasting appreciation for the technicians who would, from now on, do our lab work.

"I think I've found a likely sounding answer to this unknown."

"The patient may either lie down or be up and about during the determination of Urea Clearance."

While Path and Micro busily sloughed whole sections from the G.I. tract of the class, Physical Diagnosis began with one lecture per week. This was generally ignored in the hubbub of sophomore survival until one day Dr. Brest put us in orbit with the shh-boom of cardiac pathology. Obviously they now meant business!

Skill at Physical Diagnosis is a goal that is constantly pursued and infrequently attained. The degree of proficiency that we aspire to reach can be attributed in some part to the outstanding introduction we received as sophomores.

# physical diagnosis

MORTON FUCHS, M.D.

"Eureka! I've found it!"

ALBERT N. BREST, M.D.

*Assistant Professor and Head, Section of Hypertension and Renology*

"Just buy this little book and I guarantee that you'll pass Physical Diagnosis!"

# those last eight weeks

"They're trying to compete with Playboy!"

"Wouldn't you gentlemen lahk to come down hyar an' examine this patient?"

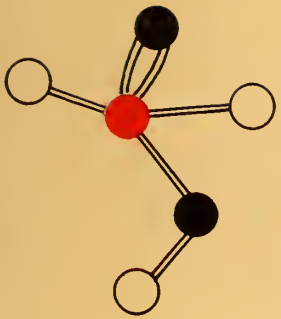

Through bile-stained glasses (or with a jaundiced eye).

Diuril, 1000 gm., t.i.d., p.r.n.

# CLINICAL YEARS

"The future belongs to those who prepare for it."

Blair General Hospital

Medical Muscle Man

"Where's the Men's Room, dammit?"

Wet conference in GYN.

# medicine

The Medicine people put on a show which was well worth the price of admission. Intellectual challenge aside, the faculty, from the research of Dr. Moyer to the sophistication of Dr. Likoff, the brilliance of Dr. Fuchs and the grammar sessions of Dr. Reimann, presented quite a thorough course of instruction.

Affiliations ran the gamut from hot to cold. Who could forget Fuzzy Ears or the vegetable patch at PGH? Who would deny the teaching value of General Medical Clinic or the ancillary course in sexology offered in Dermatology Clinic?

The residents displayed sufficient wit and humor to be called human beings. Bill Oakes doing the perpetual twist . . . Bob Botnick and his slides . . . Joan Kornblum and the "brighter side" . . . all characters in a department with character.

JOHN H. MOYER, III, M.D.

*Professor and Chairman, Department of Medicine*

"I desire no epitaph other than the statement that I taught medical students in the wards, as I regard this as by far the most useful and important work I have been called upon to do."

Sir William Osler

HOBART A. REIMANN, M.D.

*Professor and Head, Section of Public Health and Preventive Medicine*

"I wonder what these kids would do without penicillin . . ."

WILLIAM LIKOFF, M.D.

*Clinical Professor and Head, Section of Cardiovascular Diseases*

CHARLES THOMPSON, M.D.

*Professor and Head, Section of Gastroenterology*

LEON CANDER, M.D.

*Assistant Professor and Head, Section of Chest Diseases*

"Wait 'til I catch the student who put Helium in here."

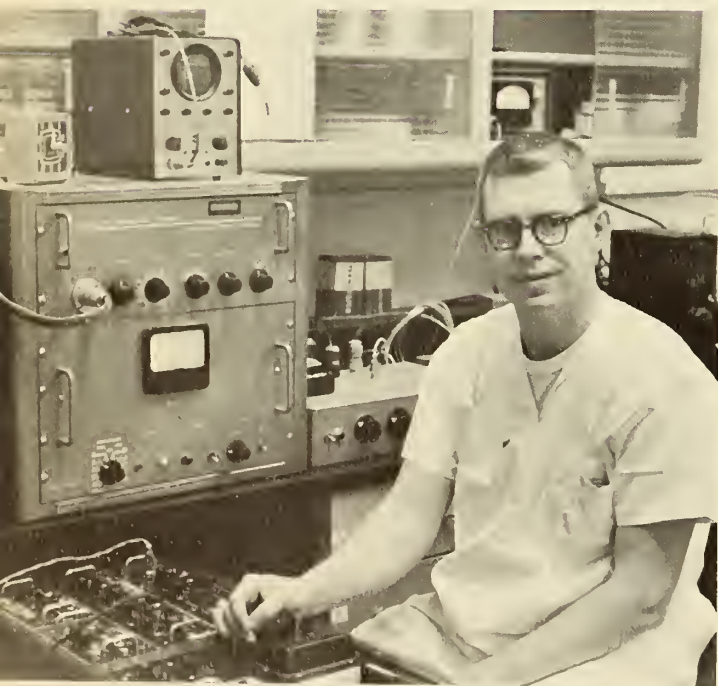

DONALD BERKOWITZ, M.D.

WILBUR OAKS, M.D.  
*at rest*

LEWIS C. MILLS, M.D.  
*Clinical Professor and Head, Section of Endocrinology  
and Metabolic Diseases*

B. MARVIN HAND, M.D.  
*Professor and Head, Section of Neurology*

DANIEL J. McCARTY, M.D.  
*Assistant Professor and Head,  
Section of Rheumatology*

FITZHUGH C. PANNILL, M.D.  
"Honey Fitz"

GORDON BENDERSKY, M.D.  
"A.T.&T. down 1 1/2 . . ."

BERNARD L. SEGAL, M.D.

## surgery

JOHN M. HOWARD, M.D.  
*Professor and Chairman, Department of Surgery*

The human retractor is a totally mute, senseless animal, incapable of learning, whose actions are reflexly oriented to maintain sham rage in the surgeon, hypertensive encephalopathy in the resident, decerebrate rigidity in the scrub nurse, sepsis in the patient, and the Waterhouse-Friderichsen syndrome in himself. He is unable to see the field, the pathology, the surgery or the sutures. He sees only the knots, which he cuts. His major stimulus is the bellow, which can either initiate or inhibit reflex activity. He also responds to the roar and the screech. He has never been exposed to the whisper. He must be able to maintain rigid immobilization while holding his retractor at arms length. But the experience he gains is immeasurable and is the highest tribute to this Age of Specialization.

ALEXANDER E. PEARCE, M.D.  
"So Trop is still scrubbed, eh nurse?"

"I don't want to say anything doctor, but you sewed your glove into the anastomosis."

CHARLES C. WOLFERTH, M.D.  
"Unaccustomed as I am to public speaking . . ."

ALEXANDER ULIN, M.D., EDWARD E. EHRLICH, M.D.

You get no pity in the pit.

FRANK TROPEA, JR., M.D.

"No, I didn't have a bull's breakfast this morning."

ROBERT BOWER, M.D.

But I really like ward surgery.

*Shotgun Therapy*

The department of Obstetrics resembles an iceberg in the South Pacific—melting. The unshaven resident seals frolic at the base, snarling scraps from the two chief bears perched precariously at the top. Frozen in the ice and just barely visible are a group of students, seated on mounds of bloody sheets, their hands forever fixed on a pregnant belly.

Oh Lawdy, what fun! The hallmarks of accomplishment Junior year were avoiding severe bodily trauma getting out of the top bunk and fitting a diaphragm using only one glove under the sympathetic guidance of Miss Brown.

Senior sendoff consisted of three weeks in limbo at PGH or pub-jumping at H'burg, with the intense activity and intellectual stimulation of the Big H and Booth Hotel serving to render us competent and polished. May the iceberg drift once more into hospitable waters.

# obstetrics and gynecology

NEWLIN F. PAXSON, M.D.  
*Professor and Chairman, Department of  
Obstetrics and Gynecology*

WILLIAM A. REISSTEIN, M.D.  
"Remember that, doctor, that's a nugget."

SEYMOUR STEIN, M.D.  
"I understand—everyone's entitled to sleep late now and then."

DOMINIC J. PONTARELLI, M.D.  
"Eight centimeters and 100% already?"

ROBERT M. HUNTER, M.D.  
"That's right, fourteen straight nights at PGH."

"How come you're the only one here at this hour, Faunce?"

"Oh, I'm just trying to get some experience with Pit, Jim."

"Better you should have to see my brother?"

SARGEANT BROWN AND NEOPHYTES  
"One student to a booth, and rinse your gloves before  
throwing them away."

obs-gyn

"15.8 drops per minute, Dr. Catenacci. Keep an eye on it while I get some coffee, please."

ALFRED J. CATENACCI, M.D.  
*Professor and Head, Section of Anesthesiology*

To the geriatric patient passing gas is an interesting form of recreation but to the anesthesiologist it is a way of life. Alert and ready, busy adjusting the lights, drapes, position and chart of the patient, the anesthesiologist remains constantly attentive to the needs and desires of the surgical team. He has achieved a relationship in the operating room which is unmatched in any other phase of medicine.

## anaesthesiology

"Looks like Mike Nelson is dead."

D. DWIGHT GROVE, M.D.

CARL C. FISCHER, M.D.  
*Professor and Chairman, Department of Pediatrics*

# pediatrics

## SWEET BOIDS OF YOUTH

*Well Mother, how's your little dear feeling?  
How's that, you say he walks on the ceiling?  
Obviously its a normal Oedipal trait  
Which he'll get over when he finds a mate.*

*Now Ma'am, if you'll just hold him over your shoulder,  
For I fear my exam may make him smolder,  
You must realize that it's not nice for the little squirt  
To urinate all over the doctor's shirt.*

*This little lad complains of itching and sneezing  
Sometimes accompanied by enuresis and wheezing.  
Let's get an eosinophil count and all that tripe,  
Then refer him to Urology to check out his pipe.*

*Hail to Pediatrics, that Carnival of Fun,  
All you need is fortitude, a whip, and a gun.*

JOHN R. NOON, M.D.

"Sounds like Pharyngolaryngotracheobronchiolalveolitis to me."

WILLIAM P. GREGG, M.D.

"Think we need some honey and lemon here."

ARTHUR LIPSCHUTZ, M.D.  
0.2 of B.M.D.

"If you eat your spinach you'll grow big and strong."

JOSEPH N. DEBBAS, M.D.

J. STAUFFER LEHMAN, M.D.  
*Professor and Chairman, Department of Radiology*

MILLARD N. CROLL, M.D.

N. VOLNEY LUDWICK, M.D.

# radiology

The department appears to be normal in size and shape. Some blunting of the faculty is noted but this may represent a filling defect on the part of the student body. Delayed filling is definitely present, most apparent in the region of the third and fourth years.

Impression: A generally satisfactory department, but further studies are indicated.

# affiliations

*PGH* — "It's okay, Paul James is back at Hahnemann!"  
"I learned a new way to do the Ritgen today, you can have the next one."

*Harrisburg* — "Twelve straight weeks and nobody showed."

"Oh no, here comes that little guy again."

*Einstein* — "You can have your choice between Anesthesiology, Radiology, Orthopedics or Urology. No, its too late to switch to Harrisburg."

"Watch out, Fuzzy Ears is looking for the students."

*Misericordia* — "That's right, they don't want us playing pool."

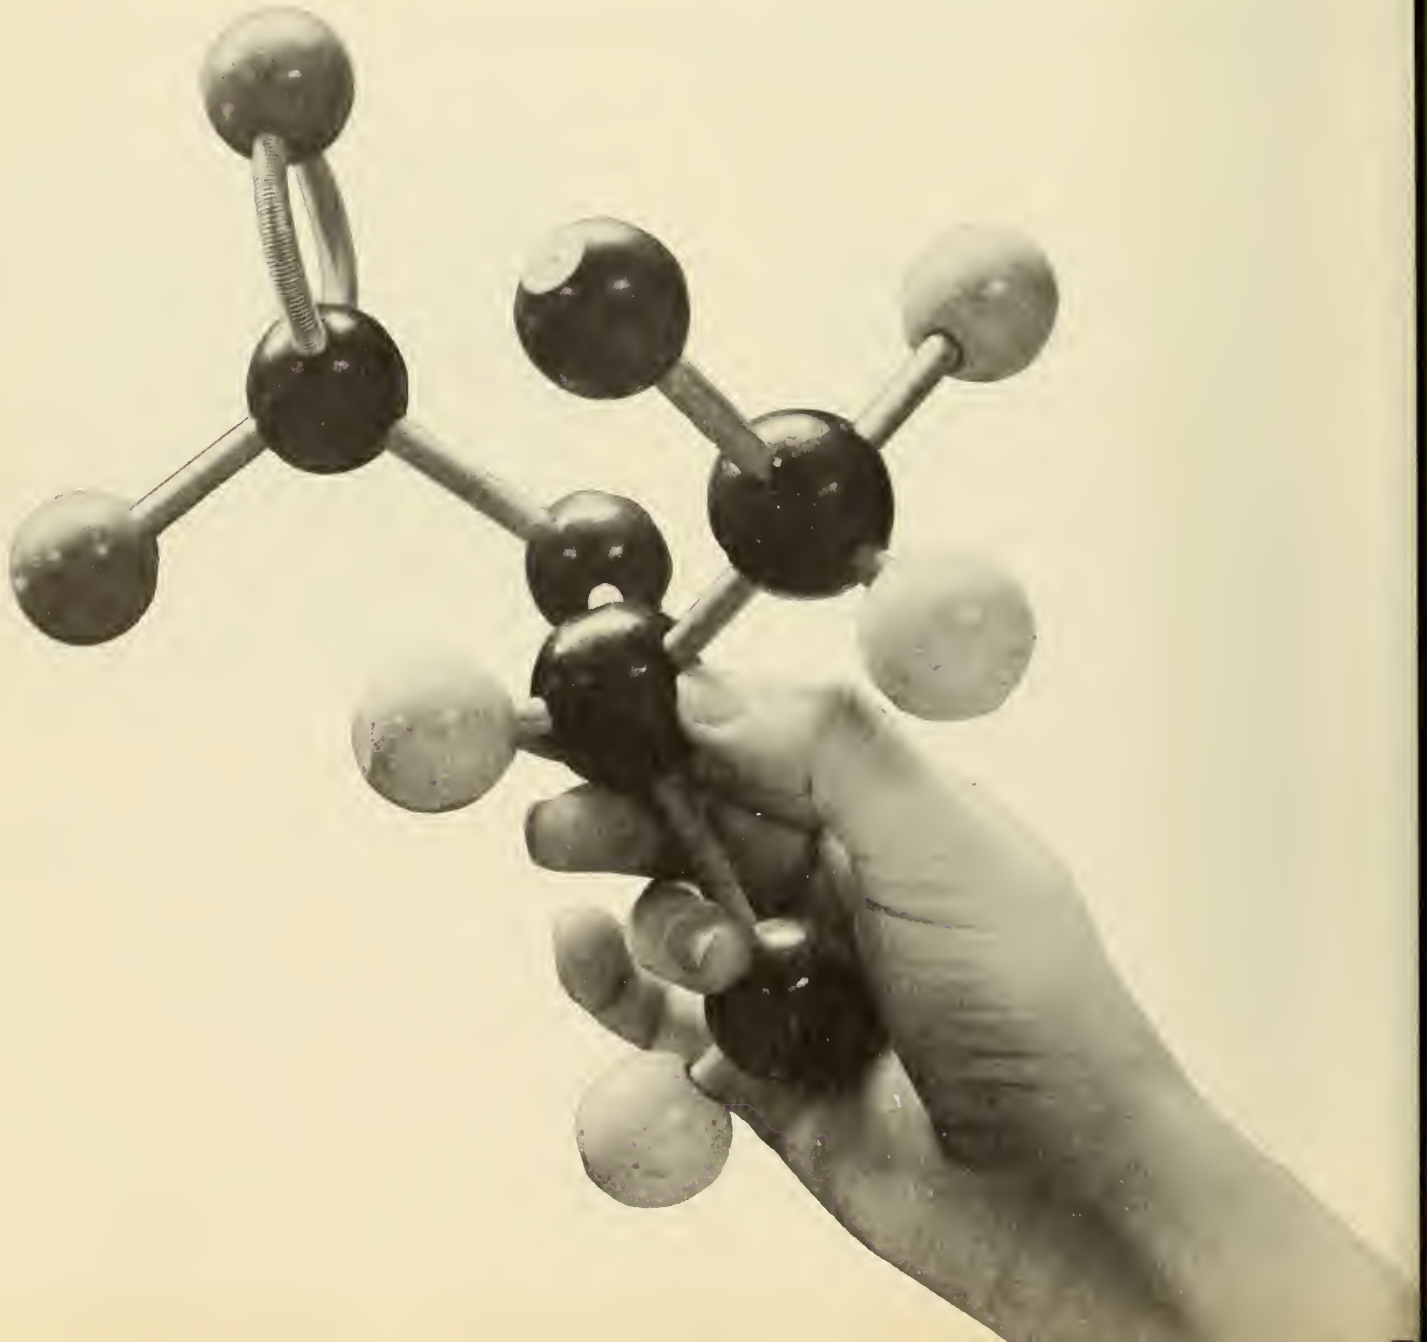

*EPPI* — "Can't tell the players without a scorecard."

*Girard* — "The soccer team will be in this week. The basketball team will be in next week. The track team will be in after the basketball team. Just annual physicals."

Medicine is unique among the professions in that it borders between Art and Science, ready at any time to prove to the one that it is truly the other. As a Science it knows no conclusion; as an Art it tolerates no one school. At the very instant that Medicine seems to have been mapped out and confined, it demonstrates for the thousandth time that its boundaries are beyond the complete comprehension of any one era.

# medicine of

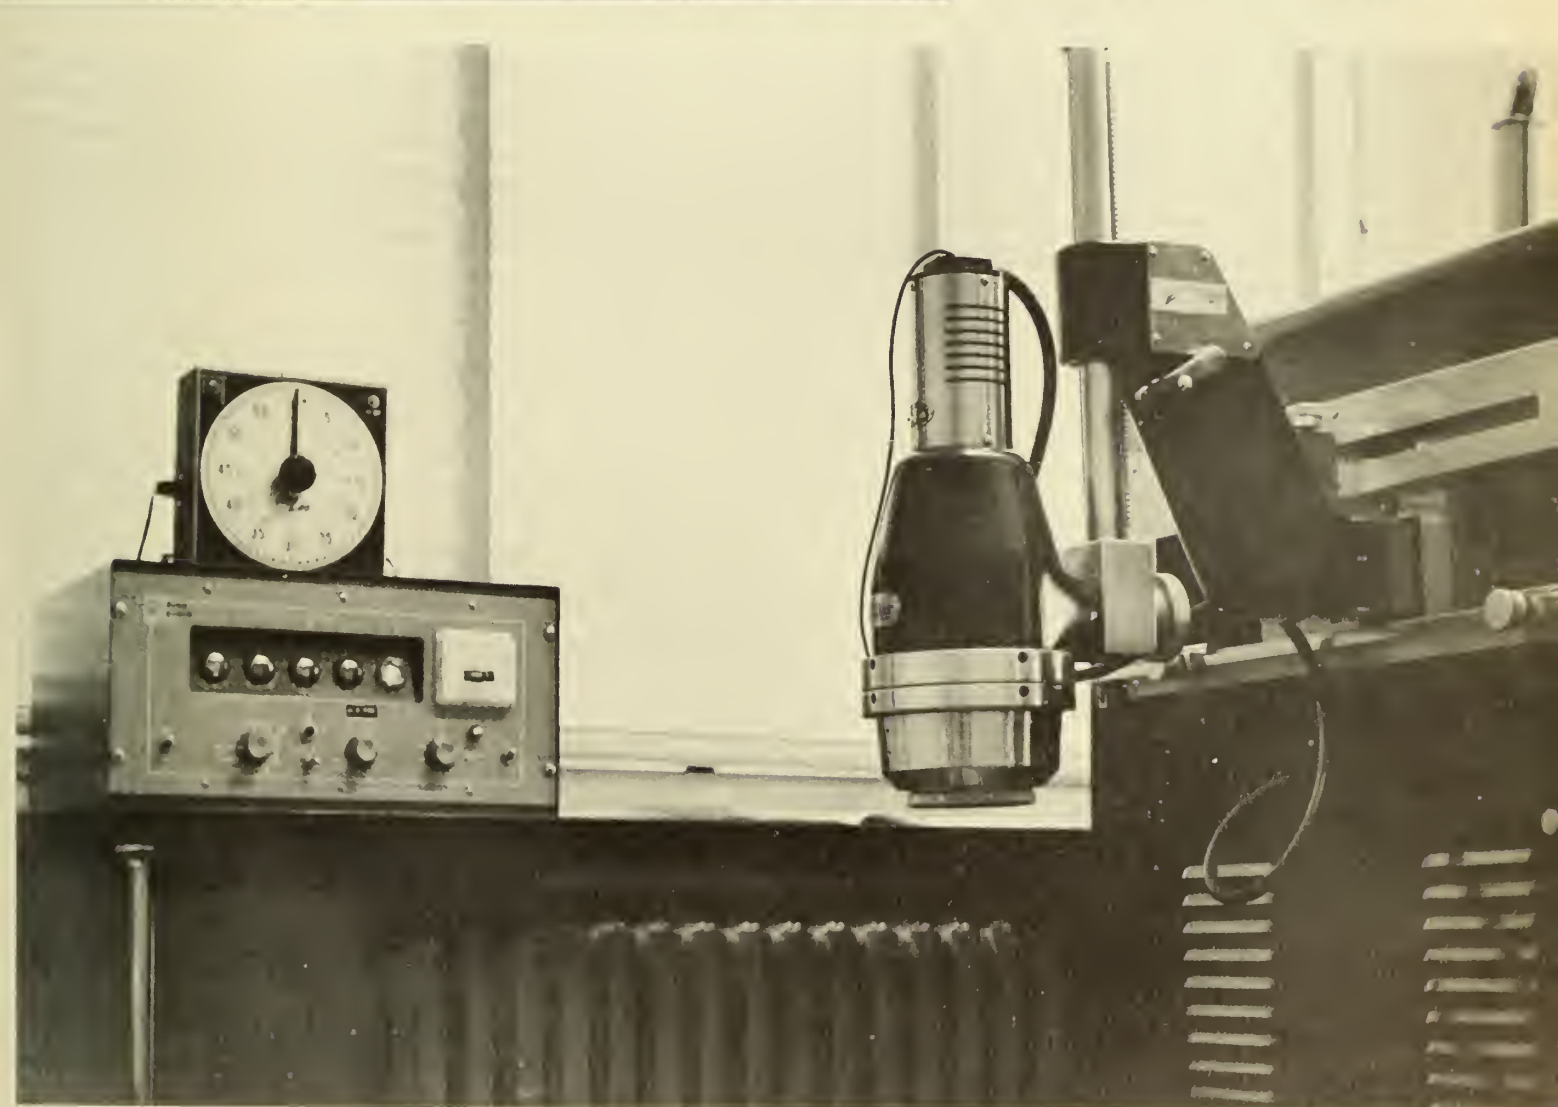

Twenty years ago Medicine stood on the threshold of a new realm. Alexander Fleming's research, investigation into the secrets of the atom, problems posed by victims of the Second Great War all combined to destroy time-honored concepts and open new vistas.

It would seem that we stand on similar ground in 1962. Advances in radiotope diagnosis and therapy, in hypothermia, in extracorporeal circulation

and even in computer assisted medical practice predict an alteration in the environment in which the Science of Medicine will be pursued. The Art of Medicine has likewise not stagnated. There are those individuals and groups in lay circles who feel the necessity of altering the doctor-patient relationship and impairing that quality of individuality in the physician which has carried Medicine to its present heights.

The manner in which we, as the future practitioners of Medicine, react to the challenges which are being handed to us daily will determine for the most part the nature of Medicine. It would seem wise then to pause for a moment and attempt to delineate the future expanse of Medicine, and in so doing, forearm ourselves, the better to function in the Medicine of tomorrow.

## tomorrow

# The Oath and Prayer of Maimonides

THE ETERNAL PROVIDENCE HAS APPOINTED ME to watch over the life and health of Thy creatures. May the love for my art actuate me at all times; may neither avarice, nor miserliness, nor the thirst for glory, nor for a great reputation engage my mind; for the enemies of Truth and Philanthropy could easily deceive me and make me forgetful of my lofty aim of doing good to Thy children.

May I never see in the patient anything but a fellow creature in pain.

Grant me strength, time and opportunity always to correct what I have acquired, always to extend its domain; for knowledge is immense and the spirit of man can extend infinitely to enrich itself daily with new requirements. Today he can discover his errors of yesterday and tomorrow he may obtain a new light on what he thinks himself sure of today.

O God, Thou has appointed me to watch over the life and death of Thy creatures; here I am ready for my vocation.

And now I turn unto my calling:

O stand by me, my God, in this truly important task;

Grant me success! For—

Without Thy loving counsel and support,

Man can avail but naught.

Inspire me with true love for this my art

And for Thy creatures,

O grant—

That neither greed for gain, nor thirst for fame, nor vain ambition,  
May interfere with my activity.

For these I know are enemies of Truth and Love of men,

And might beguile one in profession

From furthering the welfare of Thy creatures.

O strengthen me.

Grant energy unto both body and soul

That I might e'er unhindered ready be

To mitigate the woes,

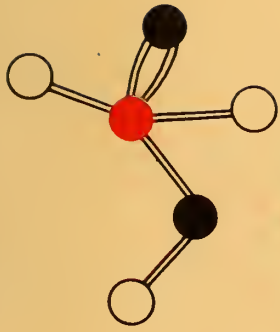

Sustain and help

The rich and poor, the good and bad, enemy and friend.

O let me e'er behold in the afflicted and suffering,

Only the human being.

TWELFTH CENTURY A.D.

# CLASSES

"Who's covering Hematology Clinic?"

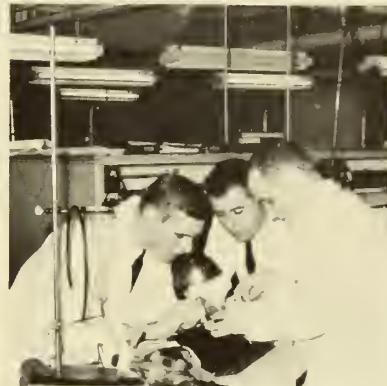

"During your Senior year you will be operating in the new Surgical Amphitheatre."

ARTS AND SCIENCES BALL  
 sponsored by  
 HAHNEMANN MEDICAL COLLEGE  
 AND  
 MOORE INSTITUTE OF

Swingin' Easy

Dean Kellow and friends

An intensive publicity program notwithstanding, Hahnemann's Town Hall Gala slid inconsequentially into oblivion in a ballroom with slightly more decor than a subway. The Moores failed to materialize as did their decorations and only the presence of the Dean, an excellent band plus the class of '62 assisted by sundry libations prevented complete disaster.

# ORGANIZATIONS

First Row: C. Buckley, V. Zarro, N. Pitha, N. Schatz. Second Row: A. Kellerman, W. Young, J. Meyers. Third Row: M. Singer, M. Katz, S. Alley. Back Row: E. Wilson, S. Spitzer, J. O'Malley.

President: Clifford J. Buckley  
 Vice-President: Marvin Derezin  
 Secretary: Melvin Singer  
 Treasurer: William W. Young  
 Advisor: Joseph R. DiPalma, M.D.

Alpha Omega Alpha is the national honor medical society to which members are elected by faculty vote on the bases of superior scholastic achievement, integrity, leadership and professional dedication. The purpose of the organization is to foster an appreciation of the moral and academic principles of medical education and practice. Established at Hahnemann in 1952, the Zeta Chapter limits its membership to students in the junior and senior years.

The society annually sponsors a lectureship at Hahnemann for the benefit of students and faculty at which many distinguished persons in the field of medicine have appeared. This year the tenth annual guest lecture was delivered by the eminent Dr. Owen H. Wangensteen, Professor of Surgery at the University of Minnesota. The organization also sponsored a bi-weekly discussion group under the direction of outstanding Hahnemann faculty members.

First Row: N. Pitha, W. McCurley, D. Kemmerer, A. Pagano. Second Row: R. Hansen, J. Padova, A. Petti. Back Row: H. Mullin, T. Clair.

## ALPHA KAPPA KAPPA

President: William S. McCurley  
 Vice-President: Nicholas R. Pitha  
 Treasurer: Dale L. Kemmerer  
 Recording Secretary: Robert A. Madden  
 Corresponding Secretary: Theodore W. Clair

Alpha Kappa Kappa was founded in 1888 at Dartmouth College. Since that time it has grown to its present membership of 23,000 men. The men of the Beta Phi Chapter at Hahnemann are proud to be part of this vast fraternity of physicians and students.

The fraternity has much to offer and each year the program becomes more varied and dynamic. Every brother has a fond place in his heart for our monthly dinner meetings. With such guests as Dr. Truex, Dr. Axel Olsen, Dr. Tropea, Dr. Mandarinio and Chuck Bednarik, the success of these affairs is easy to explain. Of course, the social calendar always includes parties and stag beer blasts.

The brethren of Phi Bet' have had a year of reorganization and reform. After selling their house on Summer Street they have joined themselves to the Jefferson chapter in hopes of furthering the social future of students on the Hahnemann campus. With our new friends and a budding group of new officers, hopes are high for the chapter as well as for improving inter-school relations.

President: Samuel Puma  
Secretary: Carl Lam  
Treasurer: Bernard Ondash

# PHI BETA PI

*Secretary:* Charles Lipton  
*Treasurer:* Joseph Simon  
*Advisor:* Donald Berkowitz, M.D.

## PHI DELTA EPSILON

Hahnemann's Beta Zeta chapter of Phi Delta Epsilon was founded in 1929 as an important link in a nationwide fraternal chain. In 1961 it strengthened that link by pledging a class of 29 men. The local and national work together to sponsor an annual medical lectureship at Hahnemann as well as an extensive program of scholarship and loan aid.

On the social side, 1961 opened with a memorable party at Dr. Weinstein's house. This was followed by a Polynesian Luau and a night with Harry Belafonte. Also in 1961 the local acquired a new house a few doors from the college. With our new headquarters, plans for 1962 seem to indicate our best year yet.

Phi Lambda Kappa was founded in Philadelphia fifty-two years ago, and the Alpha Beta Chapter was organized at Hahnemann in 1926. Its purpose is "to foster a spirit of fraternalism of mutual aid and moral support, to promote and advance the concepts of the medical sciences, and to encourage activities worthy of the highest precepts of human endeavor". Alpha Beta continues to strive to live by the high ideals set in its charter. In addition to its record of successful social events, Phi Lambda Kappa is very active in the academic aspect of medical school life. This year the annual Horace L. Weinstock lectureship has been added to the already extensive schedule of Phi Lambda Kappa activities at Hahnemann.

*President:* Jack Solomon  
*Vice-President:* Barry Glaser  
*Secretary:* Franklin Preiser  
*Treasurer:* Sandor Paskin

## PHI LAMBDA KAPPA

*President:* Francis P. Colizzo, Jr.  
*Vice-President:* Fletcher E. Zimpler  
*Treasurer:* John Corbett  
*Secretary:* Jack Rozwadowski  
*Alumni Secretary:* Thomas Urbaniak

## PHI CHI

Phi Alpha Gamma has long been a member of the Hahnemann scene. In 1948 it became a local chapter of the largest national medical fraternity, Phi Chi. Phi Chi now represents the bulwark of social life on "campus". Our numerous parties throughout the year are highlighted by the annual rushing party, the Christmas party for underprivileged children and the Founders' Day Banquet. Scholarship is also recognized in Phi Chi and we honor it each year with the Eben J. Carey award in anatomy and the scholarship award to the highest graduating Phi Chi.

This year Phi Chi introduced a new era of parties. We will all recall the "Harold's Club" gambling party—a blast worthy of the Phi Chi tradition.

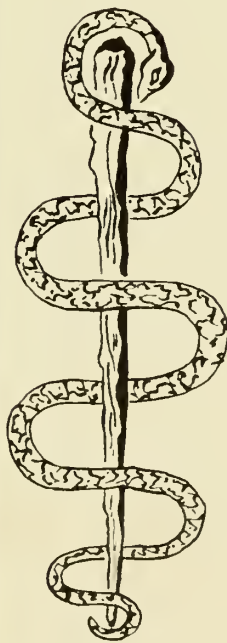

First Row: W. Young, R. Caputo, K. Miller. Second Row: R. Cavalier, F. Nagy, R. Witzig. Third Row: S. Alley, B. McAdams, J. Abda. Back Row: J. Carter, C. Buckley.

## AESCULAPIAN SOCIETY

The sober group pictured above does not represent the direct descendants of Napoleon, but rather the members of the Aesculapian Society. The club is officially the historical society of the College, but in actuality represents a group of students who firmly believe that many of the problems at Hahnemann can be solved with a few drinks, a good dinner, and a post prandial speaker. Of course we all remember the immortal words, "Next autumn we will be pleasantly disturbed by the hammering of air drills". Well, that's a problem for next year's group to solve.

We are deeply indebted to our sponsors, Dr. Derin, Dr. Imbriglia, and Dr. Oakes for their good fellowship and loyal support.

Faculty Sponsors . . . . . Alex Ulin, M.D.  
Amedeo Bondi, Ph.D.*

Since its inception 16 years ago, the Undergraduate Research Society has steadily grown until last summer 33% of the student body were actively engaged in research. Any undergraduate interested in research may carry out a project during the summer months in one of the basic sciences or clinical medicine. The

society yearly sponsors an Undergraduate Research Day at which time original summer research papers are presented. This program is followed with a talk by a leading medical researcher. An attempt is made to encourage student research in both basic sciences and clinical medicine.

# ALEXIS CARREL SOCIETY

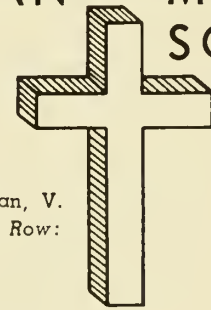

*First Row: W. Strong, T. Creamer, K. Miller. Second Row: R. Caputo, P. LaVerde, K. Giulian. Back Row: W. Young, F. Calizzo, B. Mc-Adams.*

*President: William Strong  
Secretary: Joseph O'Malley  
Faculty Advisor: Joseph Imbriglia, M.D.*

The Alexis Carrel Society is an organization of all of the Catholic medical students, nurses and technicians of Hahnemann. It is the purpose of the Society to promote the spiritual well-being of its members by presenting interesting discussions aimed at elucidating problems in medical ethics. During the past year Doctors Frignito, DiPalma, and LaFia spoke before our group together with several other imminent physicians.

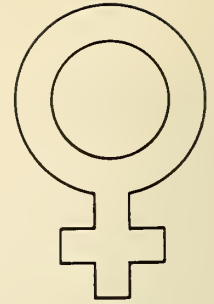

# CHRISTIAN MEDICAL SOCIETY

*First Row: C. Zechman, V. Kratz, H. Suter. Back Row: J. Rutt, J. Vroom.*

*President: Vernon H. Kratz  
Vice-President: Robert Martin  
Secretary: Ellen Bischoff  
Treasurer: Stanton Brown  
City-Wide Rep.: John Rutt  
City-Wide Representative: John Rutt*

The Christian Medical Society is a group of students who have committed themselves to seek out, understand and apply in daily experience, truth as revealed in the Bible. They have accepted the Bible as divinely inspired and as the final authority concerning the Word of God. Therefore they believe in Jesus as God, in His death as sacrificial for the sin of mankind, and in His resurrection as victory over sin and death. The program consists of weekly meetings for Bible study and fellowship, social gatherings with other chapters in the city, and participation in a clinic at one of the local rescue missions.

First Row: F. Camitta, J. Padova, H. Mullin, E. Bischoff. Second Row: I. Butler, A. Patcheisky, J. Katz. Third Row: R. Hansen, D. Crawford. Fourth Row: A. Petti, W. McCurley, T. Clair. Back Row: V. Kratz, R. Steppacher, N. Pitha.

## MAC FADYEN GYNECOLOGICAL SOCIETY

The MacFadyen Gynecological Society is one of the oldest and most active organizations at Hahnemann, founded in 1941 and named in honor of Professor Bruce V. MacFadyen. Its purpose is to foster interest in gynecology not only among those who plan to

specialize but for the whole student body at Hahnemann. This is accomplished by periodic meetings at Dr. MacFadyen's home where well known men in the field of gynecology discuss pertinent topics.

## ORTHOPEDIC CLUB

First Row: B. McAdams, F. Nagy, K. Miller. Second Row: W. Young, J. Toohy, R. Witzig. Third Row: W. Strong, R. Foxx, P. LaVerde. Back Row: S. Milstein, C. Buckley, J. Carter.

The Orthopedic Club of Hahnemann was founded in 1960 through the collaboration of the Orthopedic staff and several interested students. Members of the Junior and Senior classes are eligible and their membership is solicited. The club holds dinner meetings four times a year at which time topics are discussed by various staff members relating to orthopedic problems and progress, pertinent to both the future general practitioner and the orthopedist. The staff has shown sincere interest in this organization, particularly Dr. E. O. Geckeler. For this, we of the club thank them.

First Row: M. Singer, P. LaVerde, T. McKissick. Second Row: T. Oslick, B. Loigman, G. Seitter.  
Back Row: F. Nagy, D. Rosen.

## UNDERGRADUATE PSYCHIATRIC SOCIETY

The main functions of this organization are to help enlighten the student body concerning basic concepts in Psychiatry, to create an awareness of modern trends, and to provide some insight into prospects for the future for those interested in specializing in the field.

Each year an outstanding member of Hahnemann's Psychiatric staff invites the Society to his home for an evening get-together. The society also attends the evening sessions of the Philadelphia Psychoanalytic Society which are held at Hahnemann.

## UNDERGRADUATE WIVES ASSOCIATION

The Undergraduate Wives Association was founded to acquaint the wives of medical students with the profession of medicine — its aims, purposes and ideals — and to prepare them to accept their responsibilities as wives of medical doctors.

The year passed in a whirlwind... initiation

...Password "shhh, like the new drapes?"...  
"Oh, my aching muscles"... here comes Santa Claus... "Congratulations, here's the gavel"  
...weekend in N. Y. for free... "lovely fashions, Joanie"... PHT's at last and a sad farewell to old friends and wonderful years.

*First Row: A. Cattano, C. Diez, R. Dominic. Second Row: W. Figueroa, W. Strong, T. Zuck. Back Row: Dr. Bower, Dr. Perlmutter, W. McCurley.*

## STUDENT INSTITUTE

The Student Institute is an organization which was established over 25 years ago at Hahnemann for the purpose of promoting the social, academic and administrative welfare of the student. To carry out these tasks the Institute functions as the coordinating body between the classes as well as liaison between faculty and students. The Institute sponsors numerous social functions annually and helps to support the MEDIC. Each class is represented by its president and two elected members. The faculty advisors are Dr. H. Perlmutter and Dr. R. Bower.

The Hahnemann Band was founded in 1961 by a group of seniors who felt the need for a musical outlet to medical pressures. A large-scale organization program recruited members of the staff and faculty and in short order rehearsals were being held on a bi-weekly basis. A Christmas concert at Klahr marked the debut of the group. Further plans for a full season are in progress and the organization looks forward to becoming a permanent fixture on the Hahnemann scene.

Conductor: Seymour W. Milstein  
Secretary: Lionel U. Mailloux

The preparation of a yearbook is, at one and the same time, a stimulating challenge, a great responsibility, and a seemingly insurmountable task. At no other time and in no other place are the day-by-day and year-by-year events of our education brought together, to be preserved for all time. The MEDIC staff has attempted to follow a policy which embodies individual recall, prompted by words, phrases, and pictures. In the process we have dealt with many dark situations with the light quip and the humorous barb, while trying not to lose sight of the awesome debt that we owe to those who initiated us into the fraternity of Medicine.

Ours is not the first class in the long history of Hahnemann to have been decimated, nor is it the first class to have undergone numerous transitions and educational forays. But the experience which occupied us for the past four years was unique to us and it is for this very reason that the MEDIC adopted its policy. The only true recording of the Class of '62 is engraved on the hearts and minds of its members.

**The HAHNEMANN  
MEDICAL COLLEGE and  
HOSPITAL of PHILADELPHIA**

extends sincere congratulations to all the members of the 115th graduating class of 1962. We wish each of you every success in your years of professional service to mankind, and trust that you will recall with fond memories your student days as "one of the Hahnemann Family."

We know too that you will always be proud of your Alma Mater for her progressive role in the fully accredited training of twentieth century physicians, teachers, nurses, medical technicians and research investigators.\*

We trust you will continue to be an "active member" of the Hahnemann Family through your ever loyal interest, service and financial support.

# CONEMAUGH VALLEY MEMORIAL HOSPITAL

1086 FRANKLIN STREET

JOHNSTOWN, PENNSYLVANIA

A fully accredited voluntary general hospital of 500 beds and 40 bassinets. The hospital is located in an industrial community of approximately 65,000. Greater Johnstown including the boroughs surrounding the city has a population of 165,000 and is located 70 miles east of Pittsburgh and 120 miles west of Harrisburg.

## EDUCATIONAL PROGRAM

A twelve month rotational program beginning July 1 provides diversity of experience. The intern spends two months in pediatrics, two months in obstetrics-gynecology, four months in medicine (including psychiatry) and four months in surgery (including duty in the emergency room); laboratory anesthesiology and radiology experience is integrated into the total program.

## CONFERENCES

- |   |                                     |
|---|-------------------------------------|
| Clinical Pathological Conference — biweekly                       | Journal Club — weekly               |
| Educational Conference — weekly                                   | Medical Staff Conference — monthly  |
| Grand Rounds — monthly  | Radiology Conference — weekly       |
| Obstetrical — Pediatric Staff Conference — monthly                | Surgical Staff Conference — monthly |
| Post-graduate Lectures by nationally known physicians — quarterly |                                     |

## CLINICAL MATERIAL

Over 15,500 admissions a year. Out-Patient visits number 8,000 in 11 clinics.

<i>In Patient Diagnosis</i>	<i>Number of Cases</i>	<i>In Patient Diagnosis</i>	<i>Number of Cases</i>	<i>In Patient Diagnosis</i>	<i>Number of Cases</i>
Cancer .....	436	Neurosurgery .....	36	Pediatrics .....	2,615
Communicable .....	17	Newborn .....	1,540	Psychiatry .....	365
Dental .....	298	Obstetrics .....	1,862	Surgery .....	1,473
Gynecology .....	760	Ophthalmology .....	259	Tuberculosis .....	19
Medicine .....	3,645	Orthopedics .....	410	Traumatic Surgery .....	672
Neurology .....	161	Otorhinolaryngology .....	184	Urology .....	768

## FACILITIES

The monthly stipend for interns is \$250 plus maintenance and uniforms. Living quarters for single interns are provided at the hospital. Apartments are provided married house staff members.

## APPROVED RESIDENCIES

Anesthesiology, Pathology and Surgical Residency appointments are made from the Intern Staff at Memorial Hospital and other approved hospitals.

## INVITATION

Medical students are invited to visit the hospital to discuss internship and residence training programs with the Superintendent, the Director of Medical Education, Resident and Intern Staff and Active Staff members.

"... probably useful only in the treatment of Addison's disease."

No knowledgeable person could have predicted more for cortisone. The time was April, 1948. The conclusion by a panel of distinguished clinicians that this medical new-comer, the first of the corticosteroids, would probably be of value only against one rare disease reflected the best in scientific thinking. No one could have foreseen that in the coming decade and a half, the corticosteroids would be utilized against more than 50 diseases and disorders, and that millions of persons would benefit each year.

Merck & Co., which pioneered with cortisone, could trace its interest in the marvelous secretions from the adrenal cortex back to 1933, when it had cooperated in studies at Johns Hopkins School of Medicine. World War II gave the studies urgency when it was reported—falsely, as it turned out—that German aviators were making use of an adrenal extract to fly as high as 40,000 feet without oxygen.

The federal government had lost interest by 1944, but Merck continued to push ahead with the adrenal program, cooperating closely in this work with Dr. Edward C. Kendall and his colleagues at the Mayo Clinic. It was Dr. Kendall who had first worked out the formulas for the corticosteroids. The first laboratory synthesis of cortisone, a mile-stone in medicinal chemistry, was accomplished by a

brilliant young Merck scientist, Dr. Lewis H. Sarett, in December, 1944.

It was in September, 1948, five months after the clinicians had issued their evaluation, that Dr. Philip S. Hench, also of the Mayo Clinic, made medical history with a series of cortisone injections given to a 29-year-old arthritic woman. The patient, who had been bedfast and virtually unable to move, delightedly went shopping after one week of therapy. A new era in medicine had been born.

Within the research laboratories of Merck Sharp & Dohme, which came into existence through the merger of Merck with Sharp & Dohme in 1953, the quest for a better anti-inflammatory agent has never ceased. In these laboratories, scientists probe deeply into the basic nature of inflammatory disease. Chemists synthesize and study a wide variety of corticosteroids; pharmacologists, physiologists and physicians check these and other compounds to see how they measure up in activity and absence of unwanted side effects.

Merck Sharp & Dohme's research and development in the corticosteroid field is but one of the company's many programs of scientific investigation. The medical scientists engaged in this work are the trustees of the better medicines of tomorrow, which are now being created in their test tubes and minds.

## The story of medicine ... Your story now

The story of medicine has many chapters . . . and the cast of characters is large. Wyeth is proud to be a part of the story; proud to serve as your ally as you begin adding your own chapter.

### Wyeth pledges you:

therapeutic agents of merit, and full information about them

continued research and development of new, useful pharmaceuticals

alert, trained representatives to service your needs

Wyeth Laboratories Philadelphia 1, Pa.
